<https://itunes.apple.com/us/app/icommunicate./id364186415?mt=8>

Image2talk \$24.99

Comes with preloaded images for quick responses, food, drinks, activities, clothes and more. It's functional communication for those who can't talk or have trouble expressing ideas. This app is designed for all ages. <https://itunes.apple.com/app/image2talk-functional-communication/id530837808>

iMean \$4.99

This turns the iPad screen into a large-button keyboard.

<https://itunes.apple.com/ca/app/imean/id364906155?mt=8>

Keyboard Explorer Free

Teaches kids how to type with the sound of the letter and visual cues.

<https://itunes.apple.com/us/app/keyboard-explorer/id564902755?mt=8>

Keyboard Fun \$4.99

Designed for children. Same concept as Keyboard Explorer—teaches students letter, sounds, and associated objects with the keyboard letters.

<https://itunes.apple.com/us/app/keyboard-fun/id572392664?ls=1&mt=8>

### Kids Writing Pad \$2.99

Basic large lined writing pad to draw, spell, write, and practice letters and numbers

<https://itunes.apple.com/us/app/kids-writing-pad/id583914609?mt=8>

### Like and Dislikes \$0.99

An item in the list will be composed of an image (which can be chosen from the Camera Roll), a description, and a sound (which can be recorded by the user).

<https://itunes.apple.com/us/app/likes-and-dislikes/id545208024?mt=8>

### Look2Learn \$14.99

Has 80 different photos and allows you to record your own audio or hear a preloaded message about the photos. Designed for all ages. Really great site for five different technology applications and products for helping kids with social, physical, and mental disabilities—there is also a *Behavior Textbook* published on the site; it's a small startup from California designing the products.

<https://itunes.apple.com/ie/app/look2learn-aac/id319600029?mt=8>

### MetaTouch \$31.99

Available in **ENGLISH, GERMAN, AND FRENCH**. Spanish Coming Soon! Practice vocabulary with male and female voices, day schedules, talk buttons, images, audio recording, and pronoun-verb links. <https://itunes.apple.com/au/app/metatouch/id444046092?mt=8>

### Montell \$9.99

This is a solution for the iPad to help those who cannot speak but can use the iPad. Unlike many ACC programs which rely only on a static symbol based system, Montell not only provides preexisting symbols for common items, but also an easy user-based customizable symbol creation system where personalized photos can quickly be transformed into symbols which speak.

<https://itunes.apple.com/us/app/montell/id557758536?ls=1&mt=8>

### My Choice Board \$9.99

Other applications are available on the site. Presents an “audio-visual” display of choices that the user might want to select from to communicate his or her desires. Uses touch technology and is customizable

<https://itunes.apple.com/us/app/my-choice-board/id384435705?mt=8>

My Talk Tools \$49.99

Created by a parent of a child with ASD--easy to adapt app and workspace

<https://itunes.apple.com/us/app/mytalktools-mobile/id324286288?mt=8&ign-mpt=uo%3D4>

OneVoice \$199

iPad and iPhone format to communicate desires with pictures and user-friendly settings.

Effective and aesthetically pleasing.

<https://itunes.apple.com/bw/app/onevoice-aac/id412448074?mt=8>

iPad Communication- an autism communication system for the verbally impaired

<https://itunes.apple.com/us/app/pandapal-pecs/id492860458?mt=8>

Picture the Sentence \$9.99

Picture the Sentence helps build important language processing and listening skills at the sentence level <https://itunes.apple.com/us/app/picture-the-sentence-hd/id478599625?mt=8>

Predictable \$159.99

App that converts written word into spoken word. Uses word prediction and switch access. Ideal for a wide range of AAC users. Switch access, phrase bank, and text to speech technology.

Product of the UK

<https://itunes.apple.com/us/app/predictable/id404445007?mt=8>

<https://play.google.com/store/apps/details?id=com.product.predictable&hl=en>

Proloquo2Go: AAC In Your Pocket \$189.00

Life skills, communication, education all in your pocket

<https://itunes.apple.com/au/app/proloquo2go/id308368164?mt=8&ign-mpt=uo%3D4>

Say it and Mail it Pro Recorder for iPad \$0.99

Email a voice memo from your iPad to yourself or someone else and optionally include a photo, movie, and Google map location.

<https://itunes.apple.com/mt/app/say-it-mail-it-pro-recorder/id363193938?mt=8>

TalkTablet \$79.00

A full-featured communication solution. Words, phrases and messages are spoken with a built-in speech synthesizer or by using recorded voices. Available in over 15 language versions.

<https://itunes.apple.com/app/talktablet-neo/id501190106?mt=8>

Touch Talking \$2.99

Designed for Toddlers learning to talk--touch the image to play the sound  
<https://itunes.apple.com/us/app/touch-talking/id449776603?ls=1&mt=8>

### Type-A-Word (iPad) \$2.99

This app is designed by an Occupational Therapist. It is compatible with the iPAD on-screen keyboard, or can be used with standard or BigKeys© keyboards. It includes clear, uncluttered screens to accommodate for low-vision, and provides audio and visual cues. This app begins the process of teaching the letters on the keyboard in order to spell words.

<https://itunes.apple.com/us/app/type-a-word/id572392301?mt=8>

### urTalker Lite \$19.99

urTalker is about enabling individuals with a voice. Comes with default categories and images and provides the ability to create additional categories, load images and record your voice.

<https://itunes.apple.com/us/app/urtalker-lite/id514191060?mt=8>

### Voice4u \$49.99

Communication app that helps individuals express their feelings, actions, thoughts and needs. IoS, Android, Kindle Fire, and Nook. Also available on IoS devices, but must be downloaded from device.

<https://play.google.com/store/apps/details?id=com.voice4uaac.android.voice4u>

<http://itunes.com/apps/voice4u>

## **BEHAVIOR**

### **For Android**

#### GreenDay Free

GreenDay makes it easier to implement an ABA behavior plan by keeping track of good behavior while curbing bad behavior. A “bank” keeps track of the tokens earned by up to three children for good behavior over 31 days, and the app praises children out loud for their good behavior. GreenDay will also warn children if they are in the “yellow” or “red” behavior zones and tell them how to fix their behavior.

[https://play.google.com/store/apps/details?id=appinventor.ai\\_appliedautism.GreenDay&hl=en](https://play.google.com/store/apps/details?id=appinventor.ai_appliedautism.GreenDay&hl=en)

#### Routinely Free

Routinely helps to achieve goals and develop good habits by providing daily reminders of activities and tasks. Routinely tracks each activity and allows a weekly schedule to be defined. The daily reminders and repetition will develop these activities into good habits and improve your life. Routinely is clear and easy to use, but it relies very heavily on text, and there are very

few images. <https://play.google.com/store/apps/details?id=com.braavos.apps.routinely&hl=en>

## For IOS

### Able AAC \$69.99

Able AAC is an easy to use and customize Augmentative and Alternative Communication (AAC). The AAC is split into sections depending on user preference; Simple Interface, which contains over 30 preformed sentences, Advanced Interface for creating more intricate sentences and a Type and Speak keyboard section that is fully functional after a voice engine purchase. In addition to the AAC, it has the unique features of My Tasks, My Video and My Audio. The voice demos are flash-based, so visiting on a PC or within a flash-enabled app are necessary. There is a trial version available.

<https://itunes.apple.com/us/app/able-aac/id536483279?mt=8>

### Behavior tracker pro \$31.99

Behavior Tracker Pro collects and displays behavior data graphically for parents, teachers, and therapists. There are four sections of the app: frequency and duration data, ABC data, high frequency behavior data, and interval data. It's also possible to take video of behavior using the app to look at later, and data can be exported to a computer for further use.

<https://itunes.apple.com/au/app/behavior-tracker-pro/id319708933?mt=8>

### Board builder \$4.99

Board Builder is an easy to use app mad for the purpose of building choice boards, albums, if/then scenarios, and lesson plans for individuals with autism or other disabilities. Boards can be customized, saved, and easily edited. Pictures can be taken on the fly or imported, making the app specific to the individual. It can be used to replace picture boards or expensive augmentative and AAC devices.

<https://itunes.apple.com/us/app/board-builder/id541399577?mt=8>

### Caught being good\$0.99

Caught being good uses positive reinforcement to reward children for the things they do right without being told. Simply “catch” your child doing something good, and then ask them to spin for their reward. It's possible to customize the rewards, as well as the chances of the spinner landing on each one, making it specific to any family. The app can be used for more than one child, and will keep track of the rewards each child has earned.

<https://itunes.apple.com/us/app/caught-being-good/id527150525?mt=8>

### IPrompts\$39.99

IPrompts provides several useful visual prompting tools (no audio prompts or voice output) to help impaired individuals transition from one activity to the next, understand upcoming events, make choices,

and focus on the task at hand. IPrompts can be used to create picture schedules, social narratives, or choices between two options. There is an extensive image library which can be added to and a countdown timer to show how much time is left in an activity.

<https://itunes.apple.com/us/app/iprompts-visual-supports-schedules/id313144705?mt=8>

#### Storymaker \$29.99

StoryMaker uses pictures, text, and audio to create social stories. Each page can contain a combination of pictures, text, and audio. There is a stock library of images, and it is also possible to use images from online or those you take yourself. These social stories can be emailed and then printed out from a computer as well. This easy to use app is great for parents, educators, and clinicians.

<https://itunes.apple.com/us/app/storymaker-for-social-stories/id570007786?mt=8>

#### Working4 \$2.99

Working4 is an app used to show progress towards a goal. Set a number of tokens (1-5) needed to complete a certain task. Working4 shows the student what he or she is working for, how many tokens he or she needs, and his or her progress. Once completed, the student can cash in the tokens to return to the start. This app can be used at home or at school, and can be customized either with images from the photo library or with your own photos.

<https://itunes.apple.com/us/app/working4/id423991832?mt=8>

#### Symtrend Free

Symtrend creates an electronic diary to help understand symptom patterns, learn what triggers problems, see how well treatments are working, and get guidance to manage care. Monitor energy levels, mood fluctuations, social interactions, and much more. Symtracker also reminds you to follow treatments and coping strategies. Once you have time, sync the data to a computer to get a report about the information you entered.

<https://itunes.apple.com/us/app/symtrend/id330237672?mt=8>

## **BEHAVIORAL INTERVENTION For Android**

#### Routinely Free

Routinely helps to achieve goals and develop good habits by providing daily reminders of activities and tasks. Routinely tracks each activity and allows a weekly schedule to be defined. The daily reminders and repetition will develop these activities into good habits and improve your life. Routinely is clear and easy to use, but it relies very heavily on text, and there are very

few images.

<https://play.google.com/store/apps/details?id=com.braavos.apps.routinely&hl=en>

### GreenDay Free

GreenDay makes it easier to implement an ABA behavior plan by keeping track of good behavior while curbing bad behavior. A “bank” keeps track of the tokens earned by up to three children for good behavior

over 31 days, and the app praises children out loud for their good behavior. GreenDay will also warn children if they are in the “yellow” or “red” behavior zones and tell them how to fix their behavior. Works on Android products.

[https://play.google.com/store/apps/details?id=appinventor.ai\\_appliedautism.GreenDay&hl=en](https://play.google.com/store/apps/details?id=appinventor.ai_appliedautism.GreenDay&hl=en)

### Training Faces \$2.99

Training Faces is designed to help people with Autism Spectrum Disorder and other individuals with special needs with emotion recognition, a skill that often eludes people with disabilities. The app is geared to improve recognition of the emotion, the meaning behind the emotion and the speed at which the individual can interpret the emotion. Great Geography fun as well. Even better, a percentage of each app goes to autism charities.

<https://play.google.com/store/apps/details?id=com.poshapps.trainingfaces&hl=en>

## **For IOS**

### Able AAC \$69.99

Able AAC is an easy to use and customize Augmentative and Alternative Communication (AAC). The AAC is split into sections depending on user preference; Simple Interface, which contains over 30 preformed sentences, Advanced Interface for creating more intricate sentences and a Type and Speak keyboard section that is fully functional after a voice engine purchase. In addition to the AAC, it has the unique features of My Tasks, My Video and My Audio. The voice demos are flash-based, so visiting on a PC or within a flash-enabled app are necessary. There is a trial version available

<https://itunes.apple.com/us/app/able-aac/id536483279?mt=8>

### Behavior tracker pro \$31.99

Behavior Tracker Pro collects and displays behavior data graphically for parents, teachers, and therapists. There are four sections of the app: frequency and duration data, ABC data, high frequency behavior data, and interval data. It's also possible to take video of behavior using the app to look at later, and data can be exported to a computer for further use.

<https://itunes.apple.com/au/app/behavior-tracker-pro/id319708933?mt=8>

### Board builder \$4.99

Board Builder is an easy to use app mad for the purpose of building

choice boards, albums, if/then scenarios, and lesson plans for individuals with autism or other disabilities. Boards can be customized, saved, and easily edited. Pictures can be taken on the fly or imported, making the app specific to the individual. It can be used to replace picture boards or expensive augmentative and AAC devices.

<https://itunes.apple.com/us/app/board-builder/id541399577?mt=8>

#### Caught being good \$0.99

Caught being good uses positive reinforcement to reward children for the things they do right without being told. Simply “catch” your child doing something good, and then ask them to spin for their reward. It’s possible to customize the rewards, as well as the chances of the spinner landing on each one, making it specific to any family. The app can be used for more than one child, and will keep track of the rewards each child has earned.

<https://itunes.apple.com/us/app/caught-being-good/id527150525?mt=8>

#### IPrompts \$39.99

IPrompts provides several useful visual prompting tools (no audio prompts or voice output) to help impaired individuals transition from one activity to the next, understand upcoming events, make choices, and focus on the task at hand. IPrompts can be used to create picture schedules, social narratives, or choices between two options. There is an extensive image library which can be added to and a countdown timer to show how much time is left in an activity.

<https://itunes.apple.com/us/app/ipromptsvisualsupportsschedules/id313144705?mt=8>

#### Storymaker \$29.99

### Social Skills \$1.99

#### Hidden Curriculum

On a daily basis, we are surrounded by unstated rules and customs that can make the world a confusing place for people with autism spectrum disorders. Hidden Curriculum helps children and adolescents with ASD learn how to deal with this ever-elusive “hidden curriculum” through real-life examples and suggestions. Items cover topics such as social relationships, community, money matters, workplace, and many others.

<https://itunes.apple.com/us/app/hiddencurriculumforadolescents/id351227770?mt=8>

<https://itunes.apple.com/us/app/hidden-curriculum-forkids/id351224500?mt=8>

### iCreate Social Skills Stories \$4.99

iCreate is an easily customizable app used to create social skill story books. The app uses personal photos combined with titles, text and audio to make an unlimited number of social stories, each with as many pages as you need. Other features include a check marking feature on each page to offer visual reinforcement and a child lock to prevent the accidental deletion of data.

<https://itunes.apple.com/ca/app/i-create...-social-skills/id513666306?mt=8>

### Look in My Eyes \$2.99

Look in My Eyes rewards players for quickly focusing in on a person's eyes. Children look at a series of faces, and need to focus on the eyes quickly in order to answer correctly and earn points. The game makes repeated practice fun as children use the points they earn to buy items for their own virtual world.

<https://itunes.apple.com/us/app/look-in-my-eyes-1-restaurant/id349835339?mt=8>

### Model Me Going Places Free

Model Me Going Places is a great visual teaching tool for helping children learn to navigate challenging locations in the community. Each location (hairdresser, mall, doctor's office, playground, grocery store, and restaurant) contains a photo slideshow of children modeling appropriate behavior. Each story contains both an audio narration and descriptive text for every photo.

<https://itunes.apple.com/au/app/model-me-going-places2/id375669988?mt=8>

### My Life Skills Box Free

My Life Skills Box is an application that focuses on teaching everyday life skills, social skills, and playing with functional objects. The screen displays pictures, sounds, and text for each skill. Skills include getting dressed, showering, coping with different social situations, and much more. Each skill is divided up into steps accompanied with pictures, sound, and text. Once the action is performed a check will be placed in the task box, allowing the child to understand that the task was performed and what the next action will be.

<https://itunes.apple.com/us/app/mylifeskillsbox/id534918056?mt=8>

### PicTalk Toddler Free, upgrade \$19.99

PicTalk™ Toddler is an, alternative communication application that helps young children communicate with their family, caregivers, teachers, friends, and others that they meet in everyday life. The app offers picture icons that are organized by category and reflect natural speech development. The free version offers limited use of the app in order to see how it works before buying. This app is still being updated, and much great advancement is to come!

<https://itunes.apple.com/us/app/pictalk-toddler/id541467091?mt=8>

### Smile at Me \$2.99

For many children, understanding when a smile is called for versus when it is not appropriate can be challenging, Smile at Me is an engaging way to practice this social skill in a safe setting – with fun rewards! The app provides repeated practice in interpreting social cues to decide whether or not to smile. The app then rewards children for practicing appropriate smiling. You can see a demo at <http://www.youtube.com/watch?v=aV9TNzpVhZE>

<https://itunes.apple.com/au/app/smile-at-me/id412683190?mt=8>

### Social Adventures App\$19.99

Social Adventures was designed as a resource for running social cognition groups or for helping your own child improve his or her social interactions. You can use the app to teach children how to initiate and maintain interactions, negotiate personal space, and much more! The app contains 44 activities, as well as links to other social skills apps referenced in the app.

<https://itunes.apple.com/us/app/social-adventures/id468235375?mt=8>

### AutisMate \$149.99

Autismate is a comprehensive approach that encourages the user to develop both communication and behavioral skills. It includes a full sentence builder, video modeling, visual schedules and stories, and a content library with over 10,000 symbols. Autismate is also GPS enabled, allowing it to tie certain scenes to the user's physical location.

<https://itunes.apple.com/us/app/autismate/id512132428?mt=8>
