- Evidence base

What is WE CARE?

- Screening families for unmet material needs
- Practice-based identification of community resources and development of resource referral information
- Referral to resources for those who screen positive for unmet material need(s) *and want help meeting identified need(s)*

Why screen for unmet material needs?

- Material needs are *Social Determinants of Health (SDoH)*
 - As you all know, many families have unmet basic needs such as food security, stable housing, or a sufficiently heated or cooled home
 - These unmet needs are associated with poor health outcomes and high healthcare utilization
 - The developing brains of children make them particularly vulnerable, making early childhood a critical window for intervention

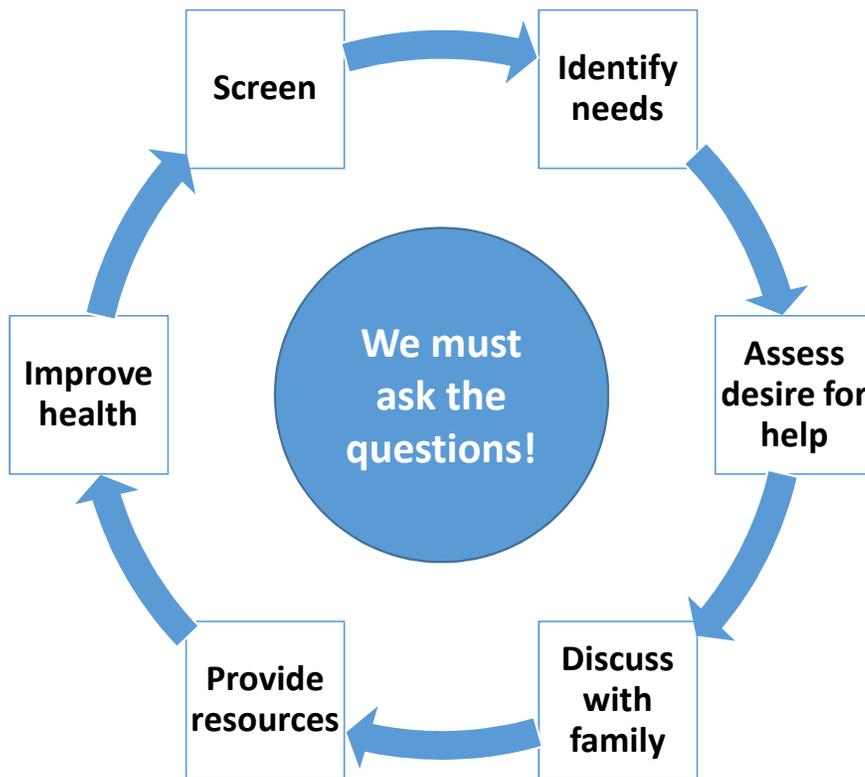

If we know this is important, why don't we already screen 100% of the time?

Why haven't you started screening up to this point? Why are you interested in starting screening now?

- Let's brainstorm! Please think about your practice.
 - Not enough time to get into it?
 - Don't know how to handle the response?
 - *"If I can't help, it's better not to ask"*?
 - Not convinced it works?

If we know this is important, why don't we already screen 100% of the time?

- Not enough time to get into it?
 - Investment of time now can reduce sick visits and emergency care down the road
- Don't know how to handle the response? *"If I can't help, it's better not to ask"*?
 - We've got some ideas for how you can help 😊
- Not convinced it works?
 - WE CARE is an evidence-based screening tool—and we'll share some of our evidence with you today!

Evidence Base

- WE CARE has been shown to
 - Increase families' receipt of referrals to community resources (70% vs. 8%)
 - Increase families' enrollment in new community resources (39% vs. 24%)
 - Increase employment
 - Connect families to childcare
 - Connect families to fuel assistance
 - Reduce families' risk of being homeless

Garg A, Toy S, Tripodis Y, Silverstein M, Freeman E. Addressing social determinants of health at well child care visits: a cluster RCT. *Pediatrics*. 2015;135: e296-e304. PMID: PMC4306802.

We will work with you!

- Every practice does things a little bit differently
- We will work with you to develop practice-specific procedures
- We want to tailor this intervention to meet the needs and preferences of your practice and patients

WE CARE Materials

- WE CARE Screener
- Family Resource 'Book'

The WE CARE Screener

- Screens for 6 material needs:
 - Childcare
 - Employment
 - Housing
 - Food
 - Education
 - Utilities (heating/cooling, water, electricity)
- *Would you like help...?*
 - Does not presume that those screening positive for a need want help addressing that need
- *Maybe Later*
 - Ensures parents know they can always access resources in future

DECLINED **WE CARE SCREENER**

We want to make sure that you know about the community resources that are available to you and your family. Many of these resources are free of charge. Please answer each question and hand it to your child's doctor at the beginning of the visit. Thank you!

The WE CARE Screener

- Handed out for all children aged 2 months to 10 years coming in for Well Child Care (WCC) visits
 - Can be given to *all* children in your practice at *all* visit types, depending on what your team decides
- If multiple children per family attending pediatric visits *on the same day*:
 - Only need **one** WE CARE screener per family per visit
 - Place (or scan) same screener into each chart
 - Which child's identifying information to write on (or sticker on) the bottom?
 - Child whose birthday comes next in the calendar year

“Thank you for coming in today! Here is a form that we are asking all families to fill out so we can better understand how to help our patients and their families. If you have any questions or would like assistance filling it out, please let myself or your child's practitioner know.”

How to distribute and collect WE CARE Screeners

- Designate a Screener for **each** family presenting for a visit.
- Patient's information may be stickered or written on.

**For families with multiple children presenting on the same day, note the information for whichever child's birthday comes next in a calendar year*

- Give the designated screener **at intake or check-in.**
- Use the laminated notecard script to introduce the Screener to families

- Review and discuss the WE CARE Screener with families **during each** Well Child Care visit.

- Store completed Screener in each patient's medical record or chart.

**For multiple children in a family, copy screener into each patient's medical record or chart*

How to discuss families' screener responses

“When I was reviewing your WE CARE screener, I noticed you don’t have any of the needs listed on the screener. Please let me know if anything changes since we do have resources we could offer! Take care and please stay in touch.”

SCENARIO 1: Do you have unmet needs?

“When I was reviewing your WE CARE screener, I noticed you have a need for employment but don’t want help right now. Is there anything I can to do support you? (If no): Please let me know if anything changes since we do have resources we could offer! Take care and please stay in touch.”

**SCENARIO 2: Do you have unmet needs?
AND if Yes, do you want help?**

**SCENARIO 3: Do you have unmet needs?
AND if Yes, do you want help?**

"When I was reviewing your WE CARE screener, I noticed you do not always have enough food for your family and would like help. Would you mind if we talked about your family's food situation and what resources I have that might help?"

**SCENARIO 4: Do you have unmet needs?
AND if Yes, do you want help?**

The Family Resource Book*

- 1-page resource information handouts for each of the six material needs
- Lists a variety of local community resources and their contact information
- Information sheets will be provided to parents that have a need **and want help meeting it**

**Not necessarily a physical book!
Can be incorporated into your EHR system.*

The Family Resource Book – Gathering resources (continued)

- Work with community partners and other service providers to identify local services and resources
- Helpful partners may include:
 - Community resource aggregators like Aunt Bertha – The Social Care Network
 - AAP’s Child Poverty clinical resources page
 - Local public health departments
 - Hospitals, social workers
 - Legal aid organizations
 - Community action agencies
 - Non-profit and faith-based organizations (e.g., Salvation Army)
 - Call 2-1-1 help line
 - Benefits.gov
 - Community Needs Assessments (CNAs)

The Family Resource Book – Gathering resources (continued)

- What to include:
 - Services
 - Contact information (phone numbers, websites, addresses)
 - Hours of operation
 - Eligibility
 - Payment source
 - Languages spoken
 - Available transportation resources

Updating the Family Resource Book

- Update resources at least every 6 months (or any time you hear a family has had trouble reaching a resource)
 - Add new resources
 - Confirm existing resources/verify contact information
- Keep an electronic version of your template with hyperlinks to be able to access websites
 - Update as necessary
- Replenish information sheets as needed

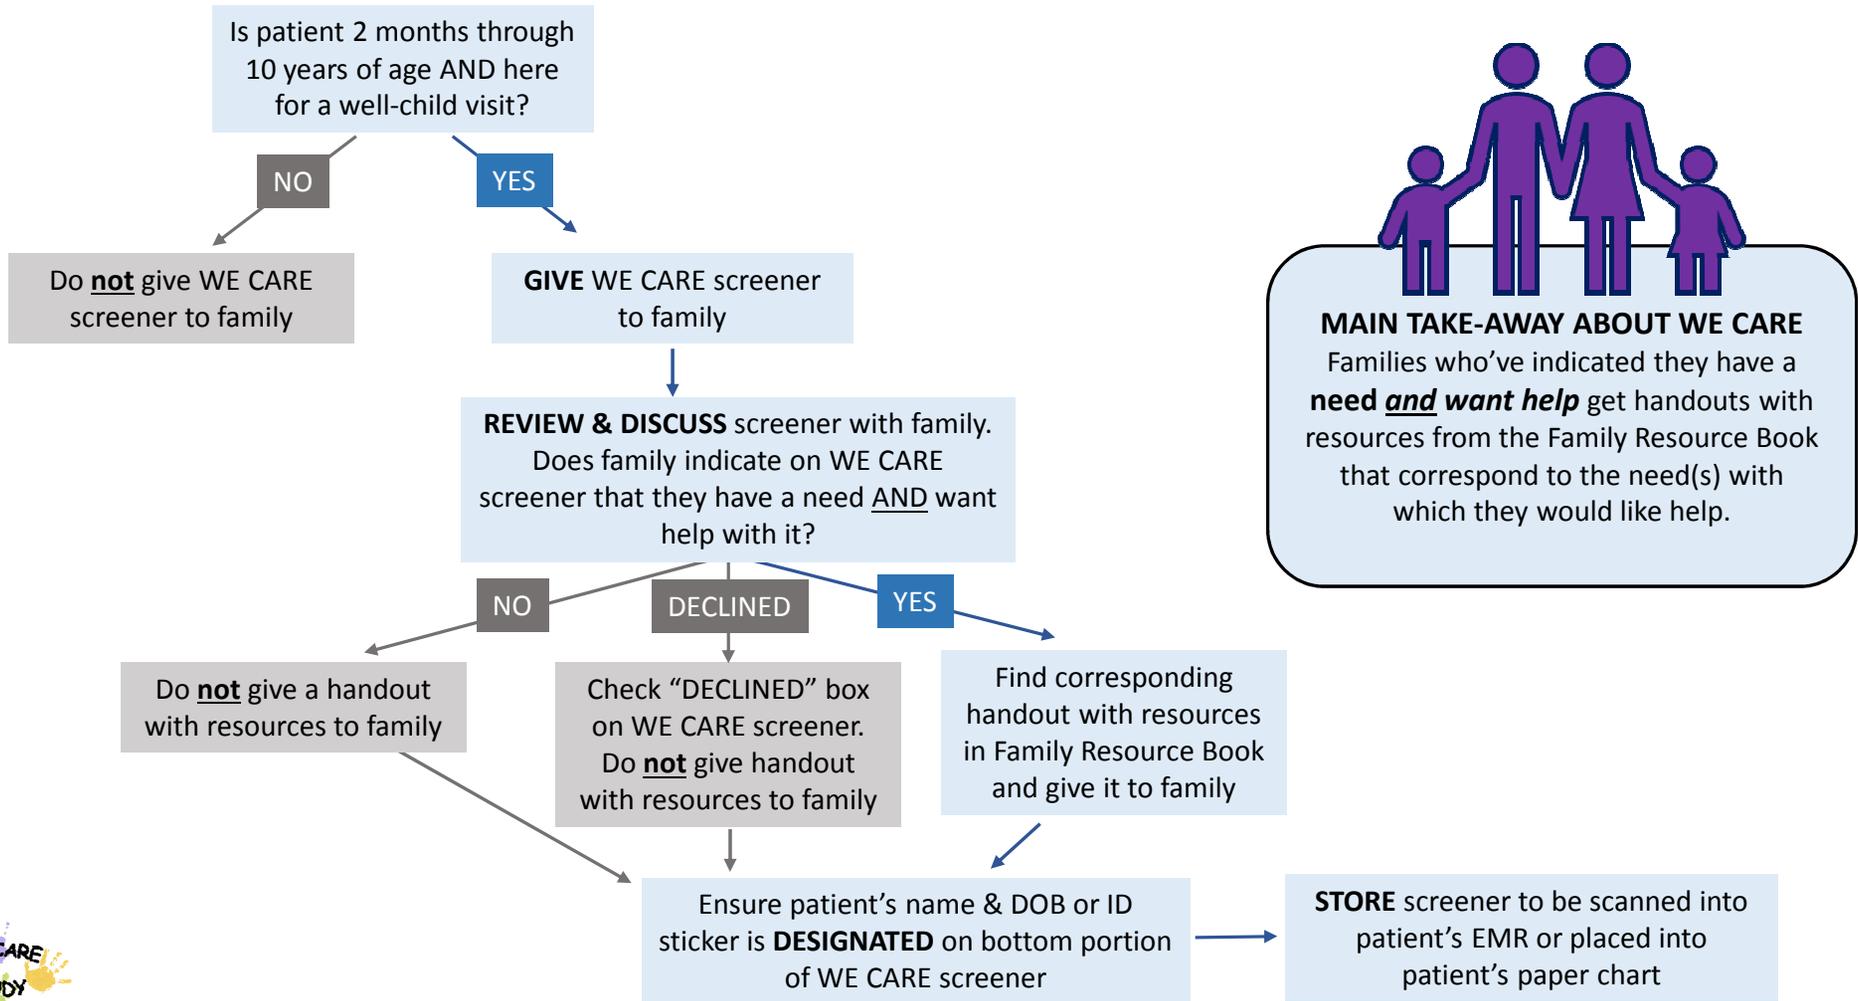

WE CARE Implementation

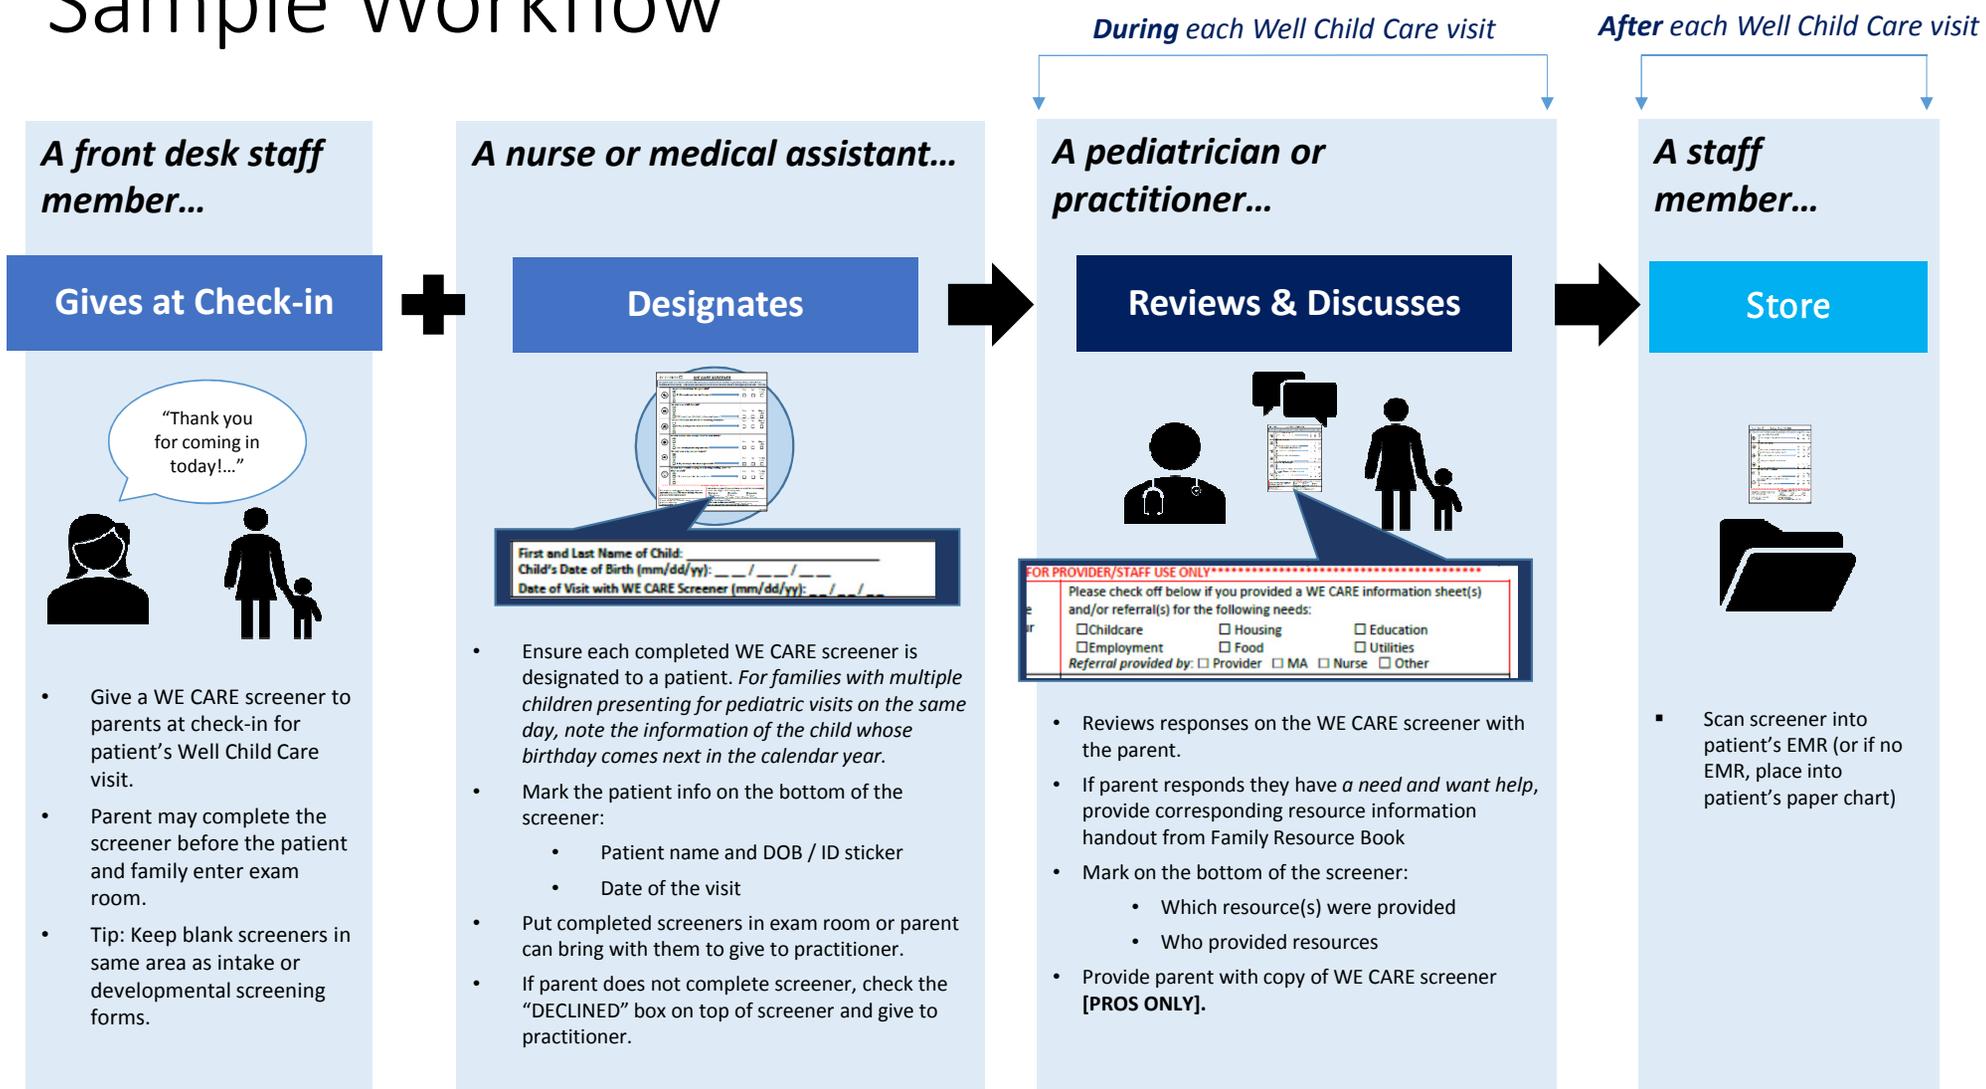

- Screening and referral flowchart
- Sample work flow
- Shared Decision Making
- Putting WE CARE into practice
- Practitioner/Staff Surveys

WE CARE Screening and Referral Flowchart

Sample Workflow

Importance of Privacy

- It is important to recognize the sensitivity of the questions being asked and ensure privacy and confidentiality of information discussed.
 - **Protect** the patient's information
 - **Inform** the patients of how their information is used
 - **Provide choice** whether their information can be disclosed
 - **Improve** the process by looking for ways to protect patients

Shared Decision Making

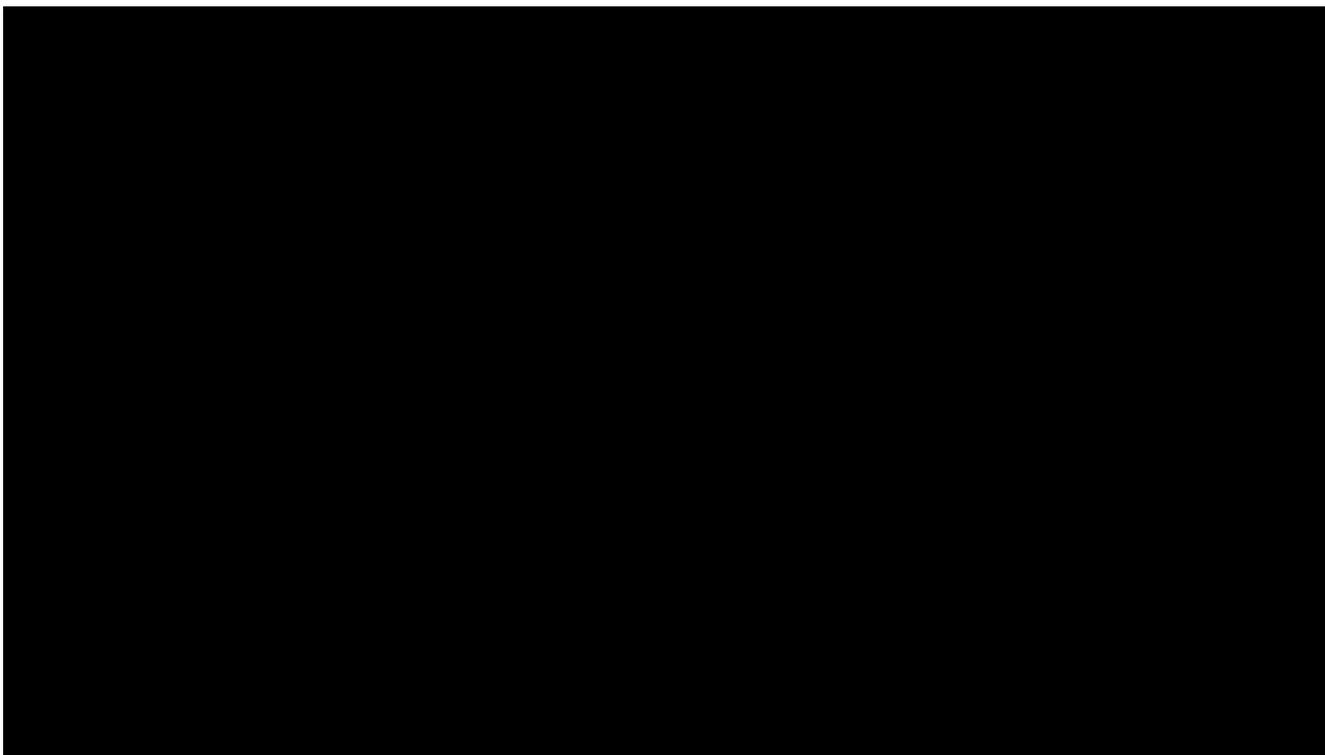

A process in which both the patient and physician contribute to medical decision-making.

- Key components of shared decision making when screening and referring for unmet material needs:
 - Universal screening (because unmet material needs are often invisible)
 - Normalize screening tool
 - Elicit parents' preferences for resources
 - Respect their decision if parents indicate they have a need but do not desire assistance currently (e.g., they mark "Maybe Later" on the WE CARE screener)

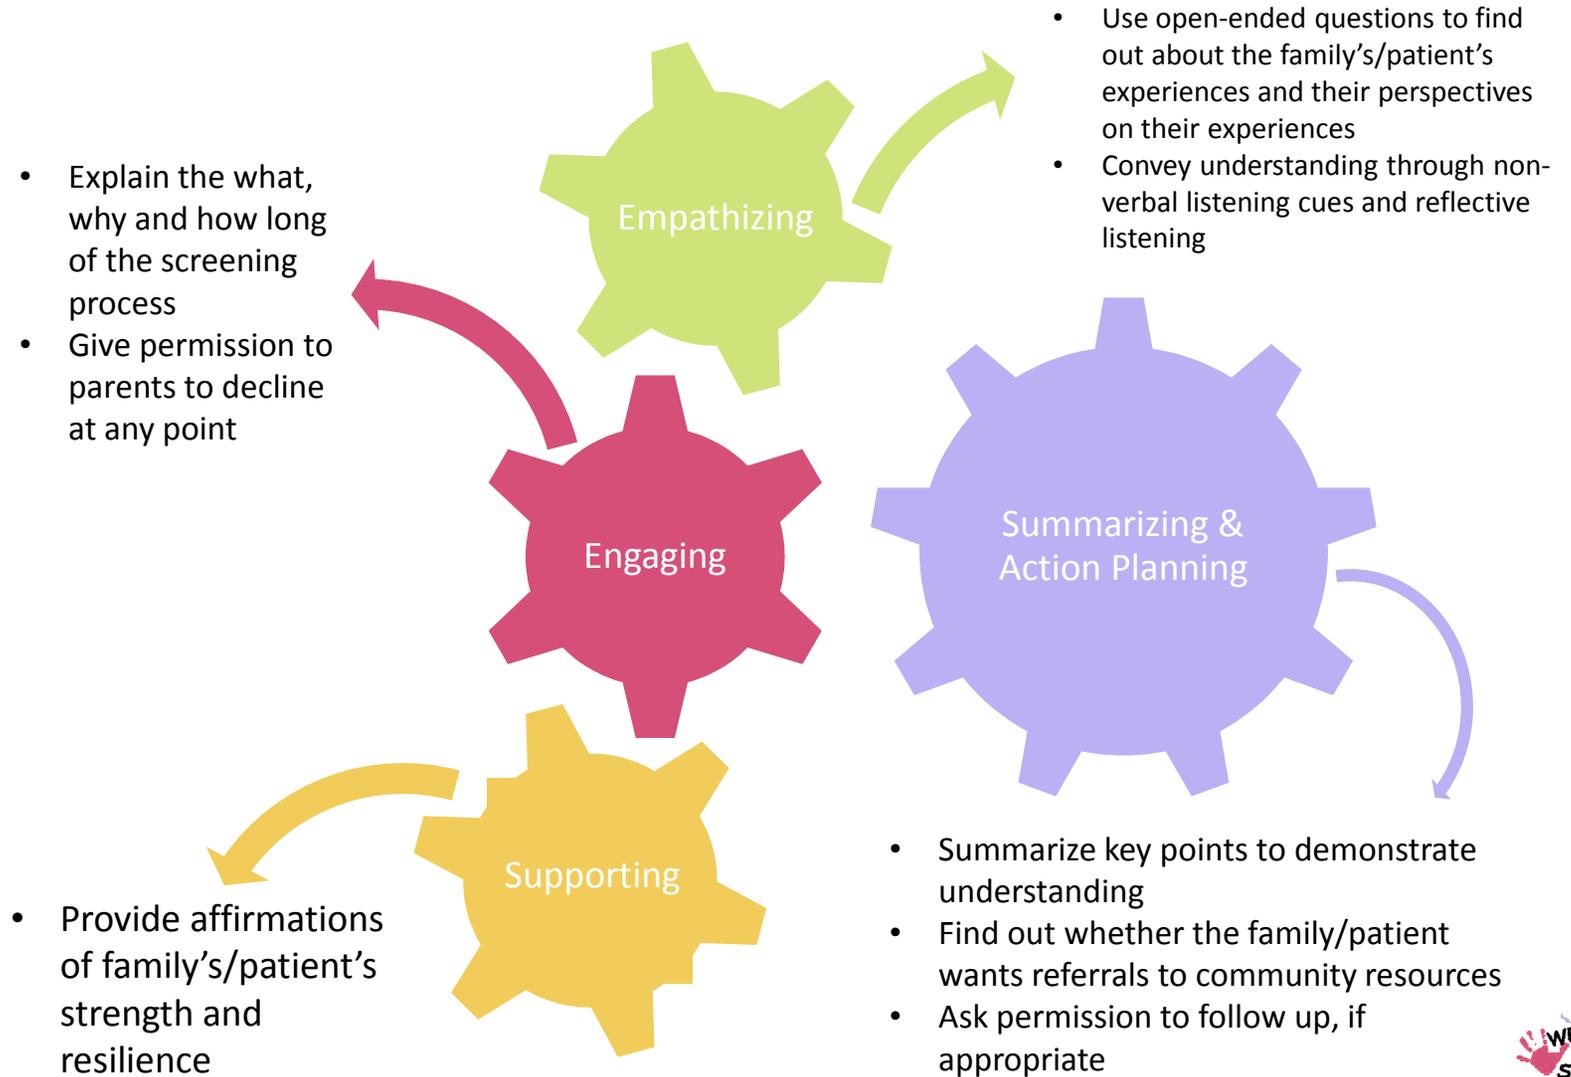

Shared Decision Making

A process in which both the patient and physician contribute to medical decision-making.

Practitioner and Staff Surveys

- Throughout the study, we want to learn from you about how WE CARE is working in your practice!
 - We will send you a REDCap link to online surveys, which we can send via email or text—whichever you prefer!
 - Very low time commitment (3-10 minutes per survey)
 - Can complete surveys on smartphone (recommend landscape mode)
 - Optional qualitative interviews

Would you be willing to have us contact you to discuss these topics more? If so, please leave your name, and phone number and/or email address.

Email Address	<input type="text"/>

Steps to WE CARE Rollout

- Identify resources and prepare Family Resource Book templates
 - BMC team reviews/approves Family Resource Book template
 - Translate Family Resource Book into Spanish
- Create Family Resource Books and place them in all exam rooms
- Participate in Core WE CARE program training
- Create practice workflow
- Roll out the WE CARE intervention! Target date?

Thank you in advance for your hard
work and support!
