

# NIH OTHER SUPPORT: WHAT'S DIFFERENT ?

Investigator transparency in disclosing resources, both financial and non-financial, is essential for the NIH to make informed funding decisions. This is a quick guide and not an exhaustive list.

## SPONSORED RESEARCH AWARDS

All sponsored awards that flow through your home institution or any other institution, domestic or foreign.

**Don't forget** to list sponsored research funding from **industry** and **foreign** sponsors, as well as **internally funded grant programs** available to you at **all institutions**.

Participation in **Foreign Talent Programs** must be disclosed.

NEW  
SECTION

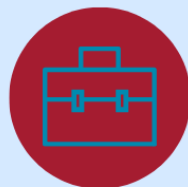

## SELF FUNDED PERSONNEL

Includes sponsored research support in the form of salary provided directly to postdoctoral fellows, graduate students, and visiting scientists. For example, this applies when an Investigator is listed in a mentor role on a fellowship.

## NON-FINANCIAL RESOURCES

Includes in-kind access to equipment, supplies, and employees supported by an outside entity that are uniquely available to an Investigator. Also includes a collaborator that runs analyses or experiments related to an Investigator's research project at no cost.

SECTION

NEW  
SECTION

## POSITIONS AND EMPLOYMENT

Includes titled academic, professional, or institutional appointments whether or not remuneration is received, and whether full-time, part-time, or voluntary (including adjunct, visiting, or honorary).

## OVERLAP STATEMENT

Unchanged: This statement should address scientific, effort commitment, and budgetary overlap between sponsored awards and non-financial resources.

## MORE INFORMATION AND SYSTEM TOOLS

More information about reporting & disclosure requirements, an **Other Support Page**, and **additional resources on the Research Operations website here:**
