

RESUMING IN-PERSON SUBJECT INTERACTIONS

Instructions: The form below is required to complete for research involving in-person recruitment, consent, and/or study visits in BMC/BU Medical Campus space. **Please fill out a separate form for each research project.** **Note:** Save the completed version of this document to your computer with the study H-number in the title, e.g., "Resuming_In-Person_Subject_Interactions_H-54321". Attach one document for each study to the ["Returning Research Staff to BMC or BU Medical Campus"](#) webform.

Project Identification:

Name of PI:

PI Email:

Department:

Project Title:

Project H-number:

BMC Activity # (as applicable):

For new studies that have not begun:

Anticipated Start Date:

Does this study fit either COVID-19

exception category ([direct benefit or safety](#)):

COVID-19 related study:

For new and existing studies:

Rationale: Describe why in-person interactions are necessary, we are encouraging remote visits as much as possible:

Space: Identify where in-person interactions will take place:

In-Person Interactions: Describe what will take place during the in-person interactions:

Number of In-Person Interactions:

Counting all *currently enrolled* subjects, how many total in-person interactions are expected per month in June-September that are *standard of care visits* with a research add-on? If any such interactions occur, how much additional time does the research interaction add to a visit?

Counting all *currently enrolled* subjects, how many total in-person interactions are expected per month in June-September that are *research-only* visits? If any such interactions occur, how much time does the research interaction require?

Counting all *future* subjects, how many total in-person interactions are expected per month in June-September that are *standard of care* visits with a research add-on? If any such interactions occur, how much additional time does the research interaction add to a visit?

Counting all *future* subjects, how many total in-person interactions are expected per month in June-September that are *research-only* visits? If any such interactions occur, how much time does the research interaction require?

Supplies: Describe your plans for cleaning before and after study visits to protect research staff and subjects, and describe any issues concerning obtaining sufficient cleaning and PPE supplies:

Grant/Contract Support : Describe considerations concerning grant and contract support. Describe any timeline constraints such as seasonal restrictions around the research study:
